Operating Frequencies

| Instrument | Frequency Range | Options |
| :--- | :--- | :--- |
| $20334-2 \mathrm{E}$ | $17.6-26.7 \mathrm{GHz}$ | 2-Way Rotor |
| $27334-2 \mathrm{E}$ | $73.8-112 \mathrm{GHz}$ | 2-Way Rotor |
| $27334-3 \mathrm{E}$ | $73.8-112 \mathrm{GHz}$ | 3-Way Rotor |

RF Specification

| Return Loss | $<-26 \mathrm{~dB}$ |
| :--- | :--- |
| Insertion Loss | $<1.0 \mathrm{~dB}$ |
| Isolation | $>75 \mathrm{~dB}$ (minimum) |

Electrical Specification
Supply Voltage 20-28 V DC
Power Consumption
Control Interface
Connector

6 W Peak
TTL-level control and indicators
MIL-C-26482 Shell 12, 10 Pin
(Pattern 105) compatible

Environmental Specification

Operating Temp
Humidity
Operating Altitude
Storage Altitude
Shock and Vibration Normal commercial transport

TTL-level Control Truth Table

| Position 1 | Position 2 | Position 3 | Position 4 | Action |
| :---: | :---: | :---: | :---: | :---: |
| 1 | 1 | 1 | 1 | No Action |
| 0 | 1 | 1 | 1 | Move to Position 1 |
| 1 | 0 | 1 | 1 | Move to Position 2 |
| 1 | 1 | 0 | 1 | Move to Position 3 |
| 1 | 1 | 1 | 0 | Move to Position 4 |

Status Indicator Truth Table

| Position 1 | Position 2 | Position 3 | Position 4 | Indication |
| :---: | :---: | :---: | :---: | :---: |
| 0 | 0 | 0 | 0 | Between states |
| 1 | 0 | 0 | 0 | In Position 1 |
| 0 | 1 | 0 | 0 | In Position 2 |
| 0 | 0 | 1 | 0 | In Position 3 |
| 0 | 0 | 0 | 1 | In Position 4 |

| Pin | Function |
| :---: | :--- |
| A | + Power In (10-14 V DC or 20-28 V DC) |
| B | O V Common |
| C | Control - Move to Position 1 |
| D | Control - Move to Position 2 ( Way Rotor only) |
| E | Control - Move to Position 3 |
| F | Control - Move to Position 4 (3 Way Rotor only) |
| G | Indicator - Position 1 |
| H | Indicator - Position 2 (3 Way Rotor only) |
| J | Indicator - Position 3 |
| K | Indicator - Position 4 (3 Way Rotor only) |

## Notes

1. Control inputs may be asserted momentarily, or continuously - switch returns to standby power level once correctly positioned. Inputs are internally pulled-up, so may be driven by microswitches to ground.
2. Indicator outputs are capable of sinking / sourcing up to 25 mA at 5 V , so may be used to drive LEDs directly.
